

Water Chestnuts

Prevent the Takeover

Water Chestnut Removal

Friends of Cossayuna Lake can remove water chestnuts at will. Small boats, such as a dingy or kayak, can be used to pull water chestnuts from the water. Wear clothes appropriate for the weather that you don't mind getting wet. If you have questions please contact LynnWilbur222@gmail.com and she will provide additional information.

It is best to bring a laundry basket or large bucket, preferably something that will drain. Disposal can occur in the trash or land fill them away from water.

Pictures of the water chestnut plant are shown below to help educate residents and volunteers.
